ESENC O 

For more than 10 years, ESENC O has been selecting, developing and marketing natural ingredients and extracts from conventional or organic agriculture for food supplements, food, specialised nutrition and health industries. As a human-size company, ESENC O gives priority to product authenticity and to human relationships.

Our know-how and skills in this trade for more 20 years have enabled us to obtain certification and standards that are essential for food safety and product quality such as IFS Broker certification, organic certification and kosher certification.

All our developments and ingredients selections meet our commitments: quality, traceability, transparency and tailor made development customisation.

We offer a wide range of ingredients from botanical extracts, probiotics, beehive product, natural vitamins and minerals, vegetables fibers, processed fruits and vegetables, yeast extracts and powder, natural dyes (including colouring foodstuffs), organic certified additives, unique natural ingredients, and vegan amino acids.

Each of the selected and marketed ingredients meets a strict specifications allowing us to guarantee you the best quality product.

Our expertise and experience enable us to meet your needs by providing you with the most suitable solution.

Don't hesitate to contact us for more information!
